**Subject:** Hatfield's Ferry data  
**Date:** Wednesday, June 11, 2014 8:24:30 AM

---

Good morning Joe,

I'm following up on a few remaining questions we had about the Hatfield's Ferry data. According to my notes, you're checking into the following:

1. Reviewing the data you provided to see if there were additional transcription errors between the spreadsheets you provided on 5/2/14 and 5/13/14. (During the last call, you confirmed which values were correct for 12/20/11, 1/3/12, 2/2/12, and 2/21/12.)
2. Provide the MDL/RL information for analytes other than arsenic and mercury. (It would be best if you provide this separate from the arsenic and mercury data you already sent us. There's no need for you to resend the arsenic and mercury data and doing so will just trigger another round of reviews to check for discrepancies between datasets.)

If possible, it would be great to wrap this up by the end of the week.

Regards,  
Ron
